Detail-oriented and creative **Front-End Developer** with hands-on experience building responsive, accessible, and user-focused web applications. Skilled in **React, JavaScript, Git and Tailwind CSS**, with a proven track record of delivering real-world projects and internship tasks. Passionate about crafting intuitive UIs, solving complex problems, and maintaining clean, reusable code.

### 🧠 SKILLS

---

**Frontend:** HTML5, CSS3, JavaScript / TypeScript, React, Tailwind CSS, jQuery •

**Tools & Platforms:** Git & GitHub, Firebase, JSON Server, MirageJS •

**Core Competencies:** Responsive Web Design, UI/UX Principles, API Integration, CRUD Operations, State Management

### 🎓 EDUCATION

---

**Frontend Development Certification**

Lagos

New Horizon, Iponri, Lagos

### 📁 PROJECTS

---

#### **Blog Manager – Web Development Posts** 🔗

- Developed a blog management application with **React** and **Tailwind CSS**, using **JSON Server** as a mock backend.
- Implemented full **CRUD functionality**: create, edit, delete, and list blog posts with unique slugs.
- Designed a clean, responsive UI with **form validation** and **loading states** for improved UX.
- Structured project with reusable components and state management for scalability.

#### **React Jobs – Dev Job Listing App (React, Tailwind CSS, MirageJS)** 🔗

- Built a job listing platform where users can **view, add, edit, and delete jobs**.
- Used **React state management & hooks** to handle job data and form interactions.
- Styled with **Tailwind CSS** for a responsive, modern UI.

- Implemented **MirageJS** to simulate a backend API, enabling full CRUD operations directly in the browser.

### FlyNow – Flight Search Application (React, Node.js, Tailwind CSS) [↗](#)

- Developed a full-stack flight search and booking app with **real-time API integration**.
- Enabled advanced filtering by **price, duration, and airline**.
- Designed a **modern, responsive UI** for seamless cross-device experience.
- Built **RESTful endpoints** to handle flight data efficiently.

### CineSearch – Movie Discovery App (React, Tailwind CSS, Firebase) [↗](#)

- Created a responsive movie search app integrated with **TMDB API** for real-time data.
- Implemented **user authentication** and **favorites management** with Firebase.
- Delivered an interactive and smooth user experience.

### Mini Projects (Practice & Concept Apps) [↗](#)

- **Interactive Quiz App** – Category-based quizzes with scoring and instant feedback. *(HTML, CSS, JavaScript)*
- **Mortgage Calculator** – Calculates monthly payments with dynamic UI updates. *(HTML, CSS, JavaScript)*

## PROFESSIONAL EXPERIENCE

---

### Frontend Development Intern

09/2025 – Present

CodeAlpha

Remote

- Worked on real-world frontend projects as part of a structured internship program.
- Built and deployed responsive web applications using **React, JavaScript, and Tailwind CSS**.
- Created and maintained clean, reusable GitHub repositories for each task.
- Documented progress and shared professional project demos on LinkedIn.

## CERTIFICATIONS

---

- Responsive Web Design Certification - freeCodeCamp [↗](#)
- Frontend Development Certification — New Horizon, Iponri, Surulere, Lagos [↗](#)
